MINING & QUARRYING / CRUSHING / ROAD & RAIL LOGISTICS

ROAD CONSTRUCTION / EARTHWORK / GSB & WMM / DBM & BC

01 / MINING & QUARRYING

The strength beneath every project.

Hard-stone quarry operations and raw material handling at the start of an integrated infrastructure supply chain.

Illustrative mining and quarrying visual

SOURCE-FOCUSED OPERATIONS

Our mining and quarrying capabilities support a steady flow of rock for aggregate production. From excavation and breaking to loading and internal movement, operations are coordinated with crushing requirements and project delivery schedules.

- Quarry development, rock excavation and material handling.
- Drilling, blasting and breaking within the agreed operational scope.
- Loading, haul-road movement and coordination with crusher feed.

SAFETY / SOURCE PLANNING / CONTINUITY OF FEED

02 / CRUSHING & PROCESSING

From hard rock to graded aggregate.

Crusher plant operations that convert quarry feed into size-wise materials for road works, concrete and infrastructure.

Illustrative crusher plant and aggregate-processing visual

650,000+

MT / MONTH | NETWORK PRODUCTION CAPACITY

Our quarry and processing network spans Gwalior and Bhind in Madhya Pradesh, Kabrai in Uttar Pradesh, and Chhapra and Pahari in Rajasthan. Production is aligned with material demand, gradation requirements and dispatch priorities.

CRUSHING > SCREENING > STOCKPILING > DISPATCH

03 / ROAD TRANSPORTATION

A fleet that keeps projects moving.

Dedicated bulk transportation with coordinated loading, dispatch and delivery across India.

Heavy-vehicle fleet image from the existing company profile

HEAVY HAULAGE TRUCKS & TIPPERS

PAN-INDIA

PROJECT LOGISTICS COVERAGE

FROM LOADING POINT TO DELIVERY POINT

Our heavy-vehicle resources connect quarries, crushing plants, stockyards and project sites. Dispatch planning brings together material availability, loading windows, route requirements and site unloading schedules for continuous bulk movement.

AGGREGATES / ROAD MATERIALS / BULK CONSTRUCTION INPUTS

04 / RAILWAY TRANSPORTATION

Long distances. Connected logistics.

Pan-India rail freight coordination for bulk material movement, connected with first-mile and last-mile road transport.

Illustrative rail freight and aggregate-handling visual

01

First-mile movement

Material movement from source to the nominated rail loading point or siding.

02

Rail freight coordination

Loading plans, rake requirements and documentation aligned with the movement.

03

Terminal handling

Coordination of loading, unloading and material handling at the rail endpoints.

04

Last-mile delivery

Road delivery from the receiving rail terminal to the final project location.

05 / EARTHWORK & FORMATION

Building the right foundation.

Excavation, embankment construction and subgrade preparation for road and infrastructure work packages.

Illustrative earthwork, haulage and compaction visual

SCOPE OF WORK

- Site clearing, excavation, cutting and disposal within approved limits.
- Borrow-earth handling, haulage and embankment placement.
- Layer-wise spreading, moisture conditioning and compaction.
- Subgrade preparation, level control, slopes and formation finishing.

PLANNED FROM THE GROUND UP

Execution aligned with approved drawings, material suitability, formation levels and project-specific acceptance requirements.

06 / GRANULAR PAVEMENT LAYERS

Strength in every layer.

Granular Sub-Base (GSB) and Wet Mix Macadam (WMM): material supply, laying and compaction.

Illustrative granular pavement construction visual

GSB

Granular Sub-Base

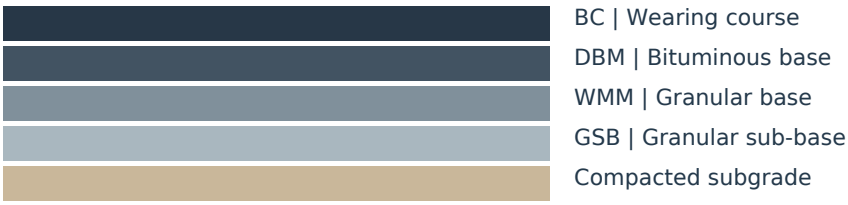

Graded material supply, spreading, moisture conditioning and compaction to the specified profile.

WMM

Wet Mix Macadam

Mix preparation, controlled transport, laying and compaction to approved gradation and levels.

TYPICAL FLEXIBLE PAVEMENT SEQUENCE

Schematic only. Layer selection and thickness follow the project design.

07 / BITUMINOUS ROAD WORKS

A finish built for the journey.

Dense Bituminous Macadam (DBM) and Bituminous Concrete (BC) road construction work packages.

Illustrative asphalt paving and compaction visual

DBM

Dense Bituminous Macadam

Bituminous base / binder layer works, including hot-mix coordination, paver laying and rolling.

BC

Bituminous Concrete

Wearing-course works focused on surface finish, riding quality, joints and consistent compaction.

EXECUTION FOCUS

Surface preparation and specified prime / tack coats; approved job mix formula; temperature control; paver laying, rolling sequence, joints and surface finish checks.

Scope, mix design and quality acceptance are agreed for each project.

08 / ONE CONNECTED BUSINESS

Integrated from source to site.

Mining, crushing, road and rail logistics, material supply and road construction brought together around project needs.

ARAVALI ONE PRIVATE LIMITED connects source operations with the demands of infrastructure delivery. Our approach brings together quarry resources, aggregate production, bulk transport and defined roadwork packages, helping clients coordinate material flow and site requirements through one responsive business relationship.

800+
OPERATIONS & MANAGEMENT TEAM

650,000+
MT / MONTH | PRODUCTION NETWORK

130+
HEAVY HAULAGE VEHICLES

ALL INDIA
ROAD & RAIL LOGISTICS FOCUS

OUR MISSION

Make construction procurement and delivery faster, more transparent and more efficient through coordinated operations and technology.

OUR VISION

Be a preferred infrastructure partner, recognised for reliable supply, responsive service and disciplined execution.

Operational figures reflect company-provided information.

09 / PRODUCT PORTFOLIO

Materials that move projects.

A sourcing portfolio for road works, concrete structures and associated infrastructure requirements.

01 Stone aggregates

10 mm and 20 mm aggregates, stone chips and stone dust; project-specific graded material requirements.

02 Road-layer materials

GSB and WMM materials coordinated with the required gradation, quantity and delivery schedule.

03 Cement & ready-mix concrete

Cement sourcing and RMC supply coordinated around grade, pour requirements and project schedules.

04 Sand & natural stone

Sand and selected natural-stone products, including granite, marble, basalt and sandstone.

05 Bitumen & industrial inputs

Bitumen, coal, fly ash and slag sourcing for agreed construction and industrial applications.

NO MITTI, 100% GITTI Clean, graded aggregates.

10 / DELIVERY DISCIPLINE

Built around your programme.

A coordinated workflow for material quality, production readiness, transport and site execution.

01

Understand the requirement

Define material grades, quantities, delivery locations, construction scope and programme milestones.

02

Align source & production

Match quarry feed, crushing output and stock availability to the agreed material and gradation requirements.

03

Plan road & rail movement

Coordinate loading, vehicle or rake requirements, handling points and delivery windows.

04

Execute & document

Maintain agreed delivery records, quantity checks, site coordination and work-package documentation.

05

Review & respond

Track progress, resolve operational constraints and align upcoming dispatch or execution requirements.

QUALITY-FOCUSED / TRANSPARENT / RESPONSIVE

11 / PROJECT HIGHLIGHT

Scale that supports infrastructure.

Ganga Expressway, Uttar Pradesh | Aggregate supply for major project stretches.

Illustrative road construction visual; not a Ganga Expressway project photograph

3.85 MILLION MT

APPROXIMATE COMBINED AGGREGATE SUPPLY

The company’s supplied business profile records approximately 1.60 million MT and 2.25 million MT of aggregate supply for two major stretches of the Ganga Expressway. This experience demonstrates the scale of material sourcing, production and logistics coordination involved in major infrastructure supply programmes.

12 / CLIENT PORTFOLIO

Trusted across infrastructure.

Selected client names from the existing company portfolio, spanning roads, engineering and infrastructure.

GR Infraprojects	**H.G. Infra Engineering**
PNC Infratech	**Larsen & Toubro**
Patel Engineering	**CDS Infra**
Atlas Infra	**SS Infra Zone**
ATCON Infra	**TIG INDOGRID**
Dr. Sand	**MCC**

FLEXIBLE ENGAGEMENT

Material supply, dedicated logistics and clearly defined construction packages can be structured around the client’s project requirements, with responsibilities, quality expectations and commercial terms agreed in advance.

A PRACTICAL PARTNER

Source availability, transport resources and project needs aligned through one coordinated approach.

13 / OUR PEOPLE

People behind every delivery.

An operating and management team that connects the quarry floor, crusher plant, transport network and project site.

800+

TOTAL MANPOWER

Across operations and management

AN INTEGRATED TEAM

Mining and plant operations, equipment operators, maintenance support, dispatch and transport coordination, site teams and management work together to support project delivery.

FOUNDER & DIRECTOR

Anshul Goyal

Mr. Anshul Goyal leads ARAVALI ONE PRIVATE LIMITED with a hands-on focus on client needs, operational coordination and technology-enabled business processes.

His approach brings project requirements and on-ground operations into a practical, responsive working relationship.

INTEGRITY / SERVICE / QUALITY / ACCOUNTABILITY

LET’S BUILD TOGETHER

Your next project.
Our connected capabilities.
